

Design your
kitchen with

Quality

Delivered as Promised

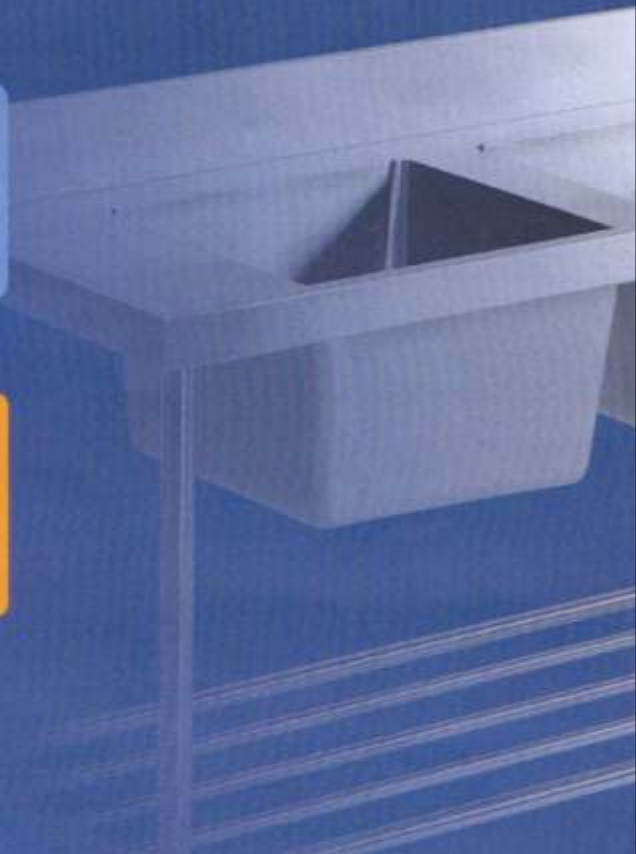

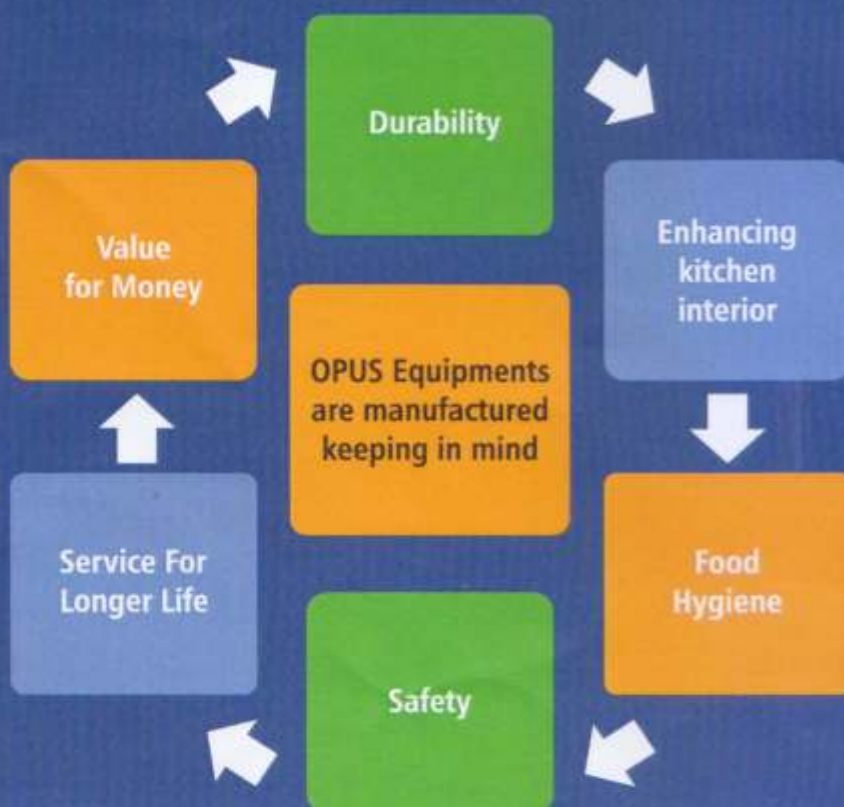

OPUS
Innovation Pvt. Ltd.

We at OPUS Innovation understand the requirement of equipment in an Indian kitchen. An Indian kitchen which experiences very heavy cooking with oil & grease requires robust equipment for long time performance and has to be economical without compromising the global quality standards.

- All Equipments are made with SS304/ (SS202 grade of steel where the part does not come in contact with the food) to ensure food hygiene
- Required thickness of steel is used to ensure strong durability of the product
- Rounded corners ensure proper cleaning of the equipment parts, avoiding food deposition thereby ensuring food hygiene
- The burners and other accessories used are of the highest quality standards to prevent any accidents in the kitchen
- The focus on the finish of the equipment enhances the interior of the kitchen
- Service will be our differentiator; we want to be a part of your business growth

We provide a complete range of fabrication. This includes standard equipment available off the shelf and custom designed as per the site requirement. A one stop solution for

- Equipment required in the preparation area
- Equipment required in the hot kitchen
- Equipment for the ventilation & exhaust system
- Equipment required in the storage area
- Equipment required in the cold kitchen
- Equipment required for ware washing
- We are also keen on developing specific equipment suggested by the Chef as per his requirement
